Summary

I am an aspiring Software Engineer and Data Science versed in languages such as Python and SQL. I'm currently a freshman at the University of Central Florida working toward my Computer Science degree accompanied by a minor in Actuarial Science and Statistics.

Experience

Front of House

Burger 21

Apr 2023 - Jul 2023 (4 months)

Burger 21 is a dynamic and fast-paced fast-casual restaurant that prides itself on delivering exceptional dining experiences. As a Front of House Team Member at Burger 21 and the first person to greet the customers, I played a crucial role in ensuring our guests had a memorable dining experience. I was to communicate with potential customers and effectively collaborate with fellow team members, including kitchen staff and other front-of-house team members, to ensure smooth operations and exceptional guest experiences. I was also to maintain a clean working environment, sanitizing everything before and after each workday. Additionally, I efficiently and accurately took customer orders at the counter, processed payments, and operated the cash register; a great deal of attention to detail ensured order accuracy and timely service.

Back of House

Panera Bread

Jun 2021 - Sep 2021 (4 months)

At Panera Bread, I was tasked with making dishes and ensuring that the kitchen area was clean and organized. I also helped maintain the cleanliness of the dining area, including clearing tables and keeping it presentable for our customers. As a first-time employee, I developed many of my interpersonal skills, such as communication and collaboration; whether it was coordinating with colleagues to keep the kitchen running smoothly or assisting customers with their orders, I learned how to communicate effectively and courteously. Additionally, I had to plan my shifts around my school schedule, homework, and extracurricular activities, which helped me become more organized and efficient in managing my time.

Education

University of Central Florida

Minor, Statistics

Aug 2023 - May 2027

University of Central Florida

Bachelor's degree, Computer Science

2023 - 2027

University of Central Florida
Minor, Actuarial Science
2023 - 2027

Hillsborough High School
Aug 2019 - May 2023

Learn Python 3 Course - Codecademy

Learn SQL Course - Codecademy

Skills

SQL • Python (Programming Language) • C (Programming Language) • Mathematics • Collaborative Problem Solving • Customer Service • Customer Support • Sales • Cooking • Microsoft Word

Honors & Awards

IB Diploma - International Baccalaureate
Jul 2023

Nomination for Daily Point of Light Award - Point of Light
Dec 2022
The Daily Point of Light Award is a recognition program in the United States that honors individuals or groups for their outstanding volunteer service and commitment to making a positive impact on their communities. I received a nomination for this award after a volunteer organization that I co-founded started to garner attention. This organization was focused on improving the status of elementary and primary eduction in my area in the STEM subjects. We would offer additional lessons and engaging demonstrations to younger students hoping to foster a lifelong interest in STEM.
